Everyday Excellence

Hand Diagnosis Radiography Imaging System design integrates our patented transmission X-ray technology for application in hand diagnostic radiography. Fully compliant with ISO, QMS, and FDA certification for bone age assessment.

Lower Dose

80% reduce
the exposure of radiation

Easy to Go

Close shielding protection can
exposure anywhere

Current Applications

BoneAge

Fracture

Future Applications

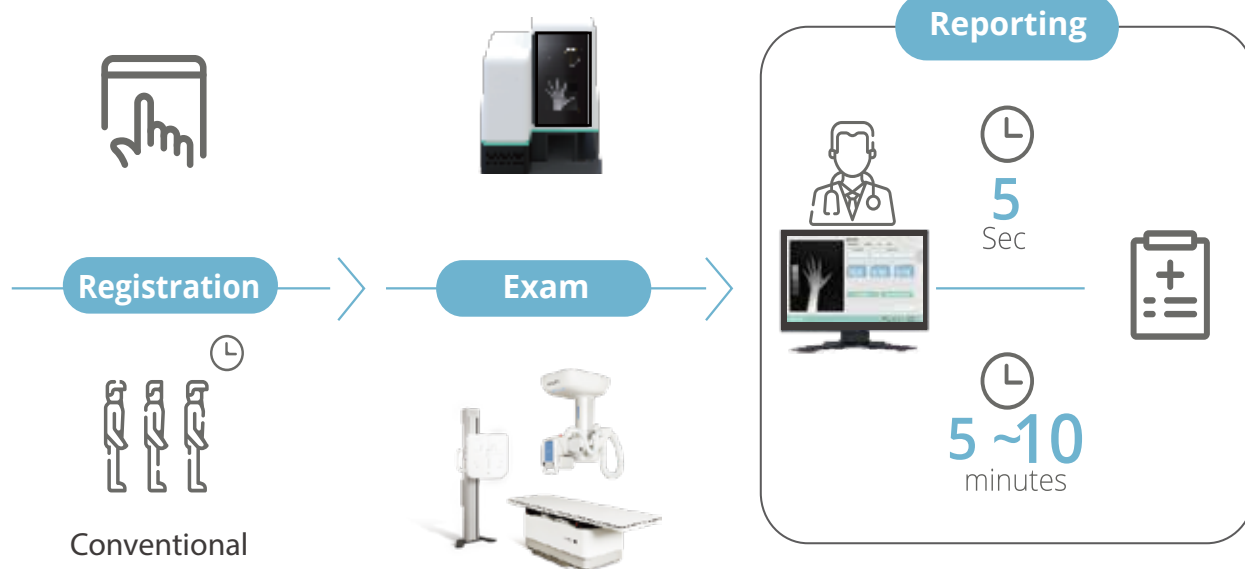

Bone Density

Gout

WORKFLOW

Hand Radiography

SEPECIFICATION

Product	Radiation System / NDR705
Tube Voltage	40 to 70 kV
Tube Current	0.10 to 0.50 mA
Spot size	0.20 mm
Dimensions	W 62 x L 64 x H 70 cm
Weight	about 80kg
Beam Angle	40° at 45cm SID
Radiation Field	10" x 12"
Radiation Shield	Less than 5 μ Sv/h at 5 cm from the surface of the chassis as per FDA 21 CFR 1020.40
